

PROUDLY SUPPORTED BY

LONE & REMOTE WORKER EMERGENCY MANAGEMENT & MONITORING

SecurePass™ supports lone and remote worker management which is ideal for staff who travel and who may find themselves in situations with a high degree of risk that may require urgent assistance and/or support.

These workers can be GPS tracked via their smartphones with each worker also having multiple emergency alert notification features including an innovative BPM reader that instantly communicate back to your business.

The added assurance of 24/7 St John emergency services monitoring is also available for an additional monthly fee. Providing total peace of mind, SecurePass users have an additional layer of emergency support including the ability to have emergency vehicles instantly dispatched to attend to those in distress.
