

INTEGRATED ACCESS CONTROL SOLUTIONS

SecurePassTM innovative technology takes contractor management to a whole new level. The SecurePassTM integration with leading access control system company Gallagher now allows your contractors to access approved areas within your buildings.

Contractor requirements including prequal, insurance, induction and contract are instantly verified in real-time before approving access and interfacing through the contractor smartphone to any Gallagher access control system.

Eliminate the need to issue, purchase and manage your contractor access cards. SecurePass can help streamline this process along with providing your business with other key benefits including contractor time and attendance verification, emergency notifications and location visibility.
