## INTEGRATED ACCESS CONTROL SOLUTIONS

**SecurePass™ innovative technology takes contractor management to a whole new level. The SecurePass™ integration with leading access control system Integrati now allows your contractors to access approved areas within your buildings.**

Contractor requirements including prequal, insurance, induction and contract are instantly verified in real-time before approving access and interfacing through the contractor smartphone to any Integrati access control system.

Eliminate the need to issue, purchase and manage your contractor access cards. SecurePass can help streamline this process along with providing your business with other key benefits including contractor time and attendance verification, emergency notifications and location visibility.
